MAS-LM

STATIONARY GROUP ANIMAL SCALE

Multi-Animal Mechanical Scale

20,000 lb Capacity from 13 x 9 ft to 22 x 11.5 ft

The MAS-LM provides reliable, accurate weighing for ranchers and processors that prefer a mechanical pipe lever weighing system. This scale combines the durability of a mechanical scale with steel I-beam weighbridge designs typically found in heavy capacity vehicle scales. With a wide range of sizes, the MAS-LM is the right choice for any stationary animal weighing application.

Racks and Gates

The MAS-LM racking is constructed with three-inch thick tubing for the sectional uprights and two-inch thick horizontal wall tubing to connect the uprights.

Above the structural I-beam, the powder-coated, 11-gauge steel plate gate is four feet tall and ensures reliable containment.

MAS-LM Scale Available Sizes	
13 x 9 ft	19 x 9 ft
15 x 9 ft	22 x 9 ft
17 x 9 ft	22 x 11.5 ft

ITCM load cell

Precision mechanical-lever system

X-Plank flooring

X-Lug flooring

Flooring

The MAS-LM offers unmatched traction for animals in wet and slippery conditions with either X-Lug or X-Plank flooring. Both styles are made from durable, recycled plastic and rubber material that will never rot or harbor bacteria and moisture like wood flooring. X-Lug flooring provides a deep, aggressive tread and X-Plank flooring utilizes a less-aggressive, wheel-accessible tread.

Legal For Trade

Like all MAS series scales, the MAS-LM is certified for commercial use in both the United States and Canada. Certified scales are held to exacting design characteristics to ensure accurate weights and allow transactions across the scale. Adding a choice of digital weigh centers, printers or remote displays creates an easy-to-use system that will provide years of proven performance.

Optional

- Ticket printer
- 590° AG indicator
- 920i® weigh center
