

# The Cattleman Chute

## The Best of Both Worlds!

- Patented Neck Extension allows for easy neck vaccinations

An affordable chute with a hydraulic headgate, patented neck extender, hydraulic squeeze, and hydraulic tailgate.

Standard with side escape both sides

- Same headgate, neck extender and tailgate as the Titan West Cattle Care Chutes
- Available with or without the palpation cage
- Designed to handle some of the largest breeds, yet versatile enough to accommodate small cattle and calves

Optional Pivot Headgate

**Standard Cattleman Chute**

Optional Swing Arm for Controls

Optional Rear Valve

Standard with Animat Floor

Standard with easily removeable chest rest

Standard with Crowd ahead bar

Standard with Mini-swing arm

**Features Include:**

Titan West's working chute is one of the strongest working chutes available today. It is a heavy duty, all steel unit, built to take abuse. The frame is of 2" square high strength steel tubing; with all stress points reinforced for added strength and durability.

A patented neck extender, also featured in Titan West's Hydraulic Headgate, gently immobilizes an animals head to make quality vaccinations, implants, etc. The Combo model offers the same features of the Standard model with the exception of an additional palpation cage, accessible from both sides.

**Other features include:**

- Double action squeeze from both sides
- A "quiet package" that includes a Animat floor for stable and sure footing for animals entering the chute. The Animat flooring reduces the noise level and encourages a calmer environment. With 10 Gauge galvaneal sheet under the mat.
- Unique crowd ahead bar encourages animals to continue moving through the chute
- A portable attachment is available for easy transport
- Scale systems are also an option for the Standard or Combo models

## **Cattleman Standard Chute -Specifications**
